

## Measurement Guide

Please take some time to look at the placement of the fenders above and try to see which one might work for your fireplace. Before you begin measuring for your fender, you must first decide exactly where you want your fender to be. First, for the sake of measurement, there are only two components that matter: **the base** (the metal part that sits on the floor) and **the leather seat**.

The easiest way to visualize how your fender will appear is to decide how wide a seat you want, usually 6-7 inches. Next, determine where the ends of the seat will abut, and then imagine the base centered under the seat.

Please provide all your measurements to the nearest 1/16 inch

Please check or fill in all that apply

1. How tall do you want your fender to be? A typical fender is 20-22 inches. \_\_\_\_\_”
2. How wide do you want your seat? (usually 6-7 inches) \_\_\_\_\_”
3. Do you have a raised hearth \_\_\_\_\_ or flat hearth \_\_\_\_\_  
if you have a raised hearth, how tall is it? \_\_\_\_\_”
4. Do you want your fender to sit on the hearth (see pic below)

or

around the hearth (see pic )

If you choose to have your fender sit on the hearth. We will need the dimensions of the hearth (see A and B on the drawing above) these dimensions will be the outside footprint of your fender base.

A \_\_\_\_\_ ”

B \_\_\_\_\_ ”

If you choose to have your fender sit outside the hearth we will also need the dimensions of A and B above, this will be the inside measurement of your base.

A \_\_\_\_\_ ”

B \_\_\_\_\_ ”

5. Please look at the figure above and provide the following measurements to the nearest 1/16 inch

A. Total width of hearth \_\_\_\_\_ ”

B. Depth of Hearth \_\_\_\_\_ ”

C. Outside width of Mantel Piece \_\_\_\_\_ ”

D. Width of the trim board (if applicable) \_\_\_\_\_ ”

E. Depth of the Mantel Piece from the wall to the outside edge \_\_\_\_\_ ”

F. Width and height of the fire box (important so the fire is centered in the dip)

\_\_\_\_\_”

G. What type of material will the fender sit on? (wood floor, brick hearth, stone hearth, marble hearth)

\_\_\_\_\_

6. Please provide pictures of your fireplace and its surrounds (gas valve, cabinets, trim, etc... anything that may be an obstacle for your fender) sometimes it is easiest to take a picture of your fireplace and mark on the picture where you want the fender to sit with the correlating measurements from above. There can never be too many pictures.

After we receive your measurements, a sales rep will call and review your measurements to make sure there are no discrepancies. If you feel at all hesitant measuring yourself, please contact us and we can arrange to have a sales rep come to your home to measure. We pride ourselves in our custom, made to fit fenders and we do not proceed with the building process until we are all absolutely clear.

If you have any other questions, please do not hesitate to call one of our sales reps.

Thank you for choosing Throwleigh Club Fenders! We look forward to building a club fender that you and your family will enjoy for generations.
